

# MICRODERMABRASION

## What is Microdermabrasion?

*Microdermabrasion is a medical technique for removing the outer most layer of skin leaving it supple and vibrant. The DiamondTomeT Wand removes this layer of skin by gently abrading the skin with natural diamond chips while at the same time vacuuming the dead skin cells away in a sterile and controlled manner. Removing this outer layer of skin leaves a smoother texture and promotes new growth.*

## DiamondTomeT Microdermabrasion

*Microdermabrasion using a DiamondTomeT Wand is similar to particle dermabrasion and chemical peels in its results but without the adverse effects of loose particles, irritation and skin reaction. Unlike other microdermabraders, the New ApeelT system uses no loose crystals or other abrasives to contaminate you or the environment. DiamondTomeT Microdermabrasion is a wonderful alternative to laser or chemical peels because it is non-invasive, non-surgical and requires no down time after treatment. Normal activities may be resumed immediately after treatment and your skin is free of redness, irritation and particle contamination. Patients experience softer, smoother and cleaner skin after the first treatment. Treatment series vary from patient to patient depending on the condition being treated and the type of skin.*

**Some of the conditions that will benefit from this treatment include:**

- Sun Damaged Skin - Face, neck, shoulders
- Age Spots - Hands, face
- Reduction of minor to moderate early aging fine lines - eyes, forehead
- Blending of cosmetic surgery or laser treatments
- Reduction of acne scarring
- Extraction of blackheads and whiteheads
- Minor scar revision
- Hyperpigmentation reduction
- Oily skin
- Rejuvenation of skin health

## Questions & Concerns

### **Q How much discomfort will I experience?**

*A Microdermabrasion treatments using the NewApeelT system are painless yet effective. The degree of effectiveness is controlled by a widely adjustable vacuum in conjunction with the varying coarseness of the four wands. Your skin care professional is trained to evaluate the effectiveness of the treatment while at the same time ensuring your comfort. Because exfoliation occurs only as the wand is drawn across the skin, and there are no crystals being blasted against the skin, the NewApeelT system is regarded as more gentle than other systems even at its highest settings.*

### **Q How will I look after the treatment?**

*A Your skin may look slightly flushed immediately after the treatment but should return to normal in 10-30 minutes. Your skin will look and feel smoother and more youthful even after the first treatment and will continue to improve with additional treatments.*
